Marcelina M.
J. Dewey Senior High
10th Grade
2nd Marking Period, Fall Semester

Proficiency Key:
4 = Exceeds proficiency
3 = Proficient
2 = Partially proficient
1 = Little or no proficiency

CBE Report Card Example

Math Teacher: Mrs. Harris	**1st Marking Period**	**2nd Marking Period**	**3rd Marking Period**	**4th Marking Period**	**Fall Semester Grade**
Proficiency indicators:					
Define and classify polygons, triangles, and special quadrilaterals	3	N/A			3
Accurately perform a variety of geometric constructions	N/A	2			2

English Teacher: Ms. Miller	**1st Marking Period**	**2nd Marking Period**	**3rd Marking Period**	**4th Marking Period**	**Fall Semester Grade**
Proficiency indicators:					
Identify rhetorical elements in a variety of texts	2	3			2.5
Build a clear argument with claims based on textual evidence	3	3			3

Each subject has proficiency indicators that are taught and assessed. Some proficiency indicators are taught and assessed over multiple marking periods, while others span a single marking period. Cumulative grades are calculated by averaging the proficiency scores for each marking period where the proficiency is assessed.

Note: This example is dramatically simpler than typical CBE report cards in real life. For schools implementing CBE, there are many ways of "summarizing" grades for a semester or school year.

Curtis T.
L.S. Vygotsky High School
10th Grade
2nd Quarter

Grading Key:
A = Outstanding
B = Above Average
C = Average

D = Below Average
F = Failing

	Quarter 1	**Quarter 2**	**Quarter 3**	**Quarter 4**	**Average for the Year**
Math	84 (B)	88 (B+)			86 (B)
English	78 (C+)	79 (C+)			78.5 (C+)

Comments	
Math Teacher: Ms. Snow	Curtis is an active participant in class, and I enjoy hearing his thoughts and questions. He is always willing to help his fellow classmates, which is much appreciated.
English Teacher: Ms. Ackerman	Curtis needs to focus on creating stronger thesis statements and supporting them with more evidence from the texts. He should keep up the consistent work on weekly vocabulary quizzes.
