

## **The Science of Beer**

### Disclaimer

<https://www.edx.org/course/the-science-of-beer>

Beer was chosen as the topic for this course, because it is an excellent example of a product with many scientific aspects in all parts of the chain – from raw materials through to production, marketing, consumption, health and societal impact. Thus, it constitutes a perfect illustration of many fields of expertise of Wageningen University & Research.

It is possible for anyone to participate in the whole course, but please be aware that tasting, drinking, buying or brewing an alcoholic beverage may be subject to laws and regulations in your country and can be hazardous. This course does not promote undertaking these activities and Wageningen University & Research cannot be held responsible for any consequences related to the course or any course assignment in any situation or circumstance. By taking part in the course and the assignments, you agree to do so responsibly at your own risk.

When talking about a product such as beer, it is impossible to stick to theory only. It is unavoidable to mention company and brand names in order to illustrate what we are talking about. Obviously, we do not have any commercial links in respect of this course and do not intend to advertise or promote the brands or companies mentioned. Likewise, we do not imply that they endorse our views or course materials.
