

Launching Innovation
in Schools:

Initial Action Plan Templates

Share your problem of practice, and some information (briefly) about your role and your context. *(For example, are you in a school or other organization? What is your location, size, demographics, or any other relevant characteristics? Feel free to be general if you are concerned about anonymity.)*

The image shows a large, empty rectangular box with a black border, intended for text input. Behind the box, there is a stylized logo consisting of three overlapping curved shapes: a light red shape at the top, a light blue shape at the bottom, and a light grey shape on the right side. The logo is partially obscured by the box.

Initial Action Plan, Part 1 - Someday: What Does Awesome Look Like?

Describe here what awesome looks like as related to your problem of practice.
(Remember you are not limited to text. Think about expressing yourself through images, video, interpretive dance, etc.)

Summarize at least 3 major facets of how you are innovating to get to awesome.

Explain why this specific innovation will help your specific problem of practice in your specific context.

Initial Action Plan, Part 2 - Monday: Concrete Steps

In the columns below, describe action steps and the impact of those steps as prompted. Consider noting important resources you'll need to take each of these steps.

Action	Impact
One step that you can do by yourself in the next two weeks.	
One step where input and help from others in your community is likely necessary or desirable.	
An idea for engaging with students as co-creators.	
An experiment around your problem of practice.	

Initial Action Plan, Part 3: Assessment Plan

In the columns below, describe how you will identify and measure the implementation of your action plan.

For your “Someday” actions, what does positive progress look like?

For your “Monday” actions, what does evidence for change look like?
